Chennai, TN | Ph: [+91 8438807386](tel:+918438807386) | aliakram9789@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

Full Stack Developer with experience building business applications, client portals, workflow automation systems, and internal management platforms using React.js, Next.js, Node.js, MongoDB, and PostgreSQL. Skilled in developing scalable frontend and backend solutions, integrating third-party services, and delivering end-to-end features from requirements gathering to deployment.

TECHNICAL SKILLS

- Frontend : React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS
- Backend : Node.js, Express.js, NestJS, REST APIs
- Databases & ORM : MongoDB, PostgreSQL, Prisma, Supabase
- Authentication & Authorization : JWT Authentication, Google OAuth, Firebase Authentication, RBAC
- State Management & Data Fetching : TanStack Query, Context API
- Cloud, Infrastructure & Deployment : AWS EC2, Docker, Vercel, Render, Linux, Domain & DNS Management, SSL Configuration
- Tools & Platforms : Git, GitHub, Postman, Firebase, Swagger API
- Integrations : Payment Gateway Integration, Third-Party API Integration, Email Service Integration
- Additional : Application Architecture, Responsive Design, Production Deployments, Performance Optimization, Technical Leadership

WORK EXPERIENCE

A4 Services.

Lead Full Stack Engineer (REMOTE)

San Ġwann, Malta
Nov 2025 – Present

- Lead the architecture, development, and delivery of multiple business platforms, overseeing technical planning, project execution, and engineering best practices.
- Directed the technical planning and execution of VACEI, a multi-service provider platform consisting of Client, Admin, and Service Provider portals, defining architecture, workflows, and feature roadmaps.
- Led the transition and continued development of A4 Audit, an auditing and compliance management platform, improving maintainability and supporting ongoing feature delivery.
- Oversaw the development of SheetsWay and SheetsWay Marketplace, contributing to architecture decisions, feature planning, and implementation strategies.
- Managed development workflows, task allocation, sprint planning, technical reviews, and stakeholder communication across multiple projects.
- Designed scalable application architectures and contributed to system design decisions for business-critical platforms.

Pixel Panda.

Full Stack Developer (REMOTE)

Dubai, UAE
Feb 2025 – Nov 2025

- Served as the primary technical contributor responsible for application development, infrastructure management, deployments, and production support across all company projects.
- Developed and maintained client websites, administrative dashboards, and business applications for organizations across multiple industries.
- Delivered large-scale projects including Al Ghwasa, Space Sculpt, UAE LED Workspace, Pop & Palm, Pixel World, and HQ Real Estate.
- Managed end-to-end deployments, hosting environments, domain administration, DNS configuration, SSL certificates, and production releases.
- Configured and maintained business email infrastructure, domain records, hosting services, and third-party integrations.

- Developed and maintained full-stack web applications and business platforms across healthcare, e-commerce, food services, and corporate domains.
- Contributed to KindRice, a production e-commerce platform, implementing frontend functionality, backend services, payment gateway integration, and business workflows.
- Developed and enhanced modules for Prepco Healthcare, improving user experience, responsiveness, and application functionality.
- Managed deployments, domain configurations, SSL setup, and production support activities across multiple client projects.

KEY PROJECTS

VACEI - Multi-Financial-Service Platform

Tech Stack : React.js, Next.js, Node.js, Express.js, PostgreSQL, TypeScript

- Helped transform business requirements into a scalable multi-portal platform serving clients, administrators, and service providers.
- Designed and implemented core workflows including Request-to-Proposal management, company structure management, and document request processing.
- Designed library and file management workflows supporting structured document organization across multiple business processes and compliance requirements.

VaazhghaValmudan - Multi-Agent Real Estate Listing Platform

Tech Stack : Next.js, NestJS, PostgreSQL, TypeScript

- Developed a real estate platform and administrative dashboard supporting customer management and business operations.
- Managed AWS EC2 infrastructure, Linux environments, Docker deployments, and production release processes.
- Investigated and resolved critical production issues, including backend-service integration and deployment-related challenges.

Kindrice - A Full Stack Ecommerce Application

Tech Stack : React.js,, Node.js, Express.js, PostgreSQL, Javascript

- Integrated payment gateway functionality and business workflows supporting customer purchases and order processing.
- Implemented Shiprocket logistics integration and developed custom package optimization logic based on product weight combinations and shipping requirements.
- Collaborated with stakeholders to define packaging standards and shipping rules that improved logistics efficiency and order fulfillment

LastBite- Mobile Application Backend & Admin Panel

Tech Stack : React.js, Node.js, Express.js, MongoDB, TypeScript

- Designed and developed backend services supporting food ordering, user management, order processing, and administrative operations.
- Built APIs, database models, and business workflows powering customer-facing and administrative functionality.
- Developed authentication, profile management, and payment-related workflows supporting platform operations.
- Contributed to multiple project phases including development, maintenance, deployment, and production support.
- Collaborated with stakeholders to implement scalable backend solutions aligned with business requirements.
